Education

Calcutta Institute of Engineering and Management (CIEM)

Sep. 2023 – May 2027

B.Tech in Computer Science & Engineering | 79%

Kolkata, West Bengal

Experience

Qbayes

Feb. 2026 – Mar. 2026

Full Stack Developer Intern

Remote

- Architected a production-grade multi-tenant ERP backend for a bakery chain with strict data isolation across companies, locations, and shops using Node.js, Express, PostgreSQL, and Prisma ORM.
- Implemented hierarchical RBAC across 5 roles with role-scoped Prisma queries — enforced at the service layer, not just routes — and JWT auth with HttpOnly cookies, refresh token rotation, and multi-device session management.
- Built stock lifecycle management (inbound → distribution → sales → expiry returns), atomic Prisma transactions for every multi-step operation, and node-cron jobs for automated expiry alerts at 7, 3, and 0 days.

Freelance

2026

Frontend Developer

Remote

- Built and deployed a production landing page for Aston Glass (glass manufacturer) — responsive, performance-optimized, and aligned with client branding.

Open Source

Emscripten | C, JavaScript | PR #26318 — Merged

Feb. 2026

- Fixed a missing `$webSockets` dependency in `emscripten.websocket_new`, resolving a runtime failure that occurred outside of `MAIN_MODULE` builds.
- Added a regression test (`test_websocket_new.c`) reviewed and approved by core maintainers kripken and sbc100.

OpenAlgo | Python | PR #898 — Merged

Feb. 2026

- Added precise type hints to helper functions in `restx.api/ticker.py`, improving type safety and IDE tooling across the trading API codebase.
- Iterated through maintainer and automated review feedback, correcting type annotations and PEP 8 formatting before successful merge.

Projects

Signalist — Stock Market Platform | Next.js, MongoDB, Inngest, Finnhub, TradingView | Live

2025

- Built a full-stack stock analysis platform featuring real-time market data, interactive TradingView charts, heatmaps, and market overviews via Finnhub API integration.
- Developed secure Next.js API routes with BetterAuth token-based authentication, rate limiting, and React-side caching for optimized performance.
- Engineered Inngest-powered scheduled background workflows to deliver daily personalized market digest emails driven by user watchlist data.
- Implemented user-specific watchlists with persistent MongoDB storage and real-time stock deduction on portfolio updates.

Technical Skills

Languages: C/C++, Python, JavaScript

Frameworks & Libraries: React.js, Next.js, Node.js, Express, TailwindCSS, LangChain

Databases: MongoDB, PostgreSQL

Tools & Platforms: Git & GitHub, VS Code, IntelliJ IDEA, Prisma, Inngest, Zod

Achievements

Smart India Hackathon (SIH) 2024

2024

- Secured **2nd Place** at the internal SIH 2024, recognized for innovative problem-solving and team collaboration.

Techno Geeks Hack 1.0

2024

- Participated in a competitive hackathon, gaining hands-on experience in rapid prototyping and real-world problem statements.

Full-Stack Web Development Bootcamp | Udemy — Angela Yu

2023

- Completed comprehensive bootcamp covering frontend, backend, databases, and deployment fundamentals.
